Tax Guide Uzbekistan

Corporate, indirect and payroll taxes for companies doing business in Uzbekistan

2026

advizenco.com · info@advizenco.com · +998 33 488 48 88

Edition of November 2026

Moderate flat rates, strict paperwork

Uzbekistan taxes profit, consumption and payroll at moderate flat rates. What decides the real burden is documentation: a deduction, an offset or a treaty rate is only as good as the paper behind it.

Tax	Rate	Who pays	Notes
Corporate income tax	15%	Resident companies and permanent establishments	20% for banks, mobile operators, markets and shopping centres. 0% for listed activities
Value added tax	12%	Companies above the turnover threshold, or voluntarily	0% on exports. Simplified 6% option for retail, catering and services
Turnover tax	4%	Small businesses below the threshold	Replaces profit tax and VAT. 1% to 4% for retail
Withholding tax	10% / 20%	Uzbek payer, on income of non-residents	10% dividends and interest, 6% freight, 20% other income
Dividends to residents	5%	Withheld by the paying company	Resident companies and individuals
Personal income tax	12%	Employees, withheld by the employer	Residents on worldwide income, non-residents on Uzbek income
Social tax	12%	Employer, on top of gross payroll	Also due on the pay of foreign seconded staff
Property, land, water	varies	Owners and users	Set by type of asset, region and purpose of use

15%
Corporate income tax

12%
VAT, personal income tax and social tax

Double tax treaties in force

3 years
Period in which tax can be reassessed

Who pays, on what and at which rate

Who pays

Resident companies pay corporate income tax on worldwide income. Permanent establishments of foreign companies pay it on income connected with their activity in Uzbekistan. Individual entrepreneurs above the turnover threshold, or those who opt in, pay it as well.

Taxable income

The base is total income less deductible expenses. An expense is deductible when it is economically justified and supported by documents, and the standard of documentation is high. Most disputes with the tax authority are about the paper behind a deduction, not about the rate.

Rates

- **15%** general rate, also for permanent establishments
- **20%** for banks, mobile operators and owners of markets and shopping centres
- **0%** for farming of own produce, the social sector, small renewable generation and, for three years from commissioning, products made with high technologies (Art. 337)
- E-commerce companies pay the general 15% instead of 10% since 1 January 2026
- A company whose income first exceeds UZS 10 billion may halve its rate for that year and the next while income stays below UZS 100 billion
- A company leaving turnover tax for the first time from 2026 is exempt for one year, except on dividends and interest

TAX PERIOD AND PAYMENTS

The tax year is the calendar year and the reporting period is the quarter. Profit is calculated on a cumulative basis, so a loss in one quarter reduces the tax for the next. Quarterly returns and payments are due by the 20th of the month after the quarter and the annual return by 1 March. Companies with prior-year income above UZS 20 billion also pay monthly advances by the 23rd (Art. 340).

Depreciation, losses and interest

Depreciation

Fixed assets are depreciated on a straight-line basis at rates no higher than these. A company may choose lower rates.

Asset group	Maximum rate
Buildings	5%
Structures, aircraft, ships, rolling stock	10%
Pipelines, power and telecom lines	15%
Machinery and equipment, cars and trucks	20%
Computers and peripherals	40%
Other assets	15%

Tax Code, Art. 306. Land and construction in progress are not depreciated. Intangibles are amortised over their useful life, or five years when it cannot be determined.

Losses

A loss can be carried forward without a time limit and without a cap on the share of profit it offsets. Losses are used in the order they arose, only against the result of a full tax year. A loss on the sale of a shareholding or a business can be set only against gains on similar assets (Art. 336).

Thin capitalisation

Interest on debt owed to a foreign shareholder with more than 20%, or to its related parties, is limited once that debt exceeds three times the company's equity, thirteen times for banks and leasing companies. Third-party loans guaranteed by the shareholder are caught too (Art. 310).

Investment deduction

20% of the cost of new technological equipment, modernisation and domestic software, and 10% of spending on new production buildings, can be deducted in the period the asset is put into use. The deduction is reversed if the asset is sold within three years (Art. 308).

CROSS-BORDER PAYMENTS

Withholding tax, treaties and permanent establishment

Withholding tax

- **10%** on dividends, interest and insurance premiums
- **6%** on international freight and telecoms
- **20%** on all other income, including service fees
- **0%** on interest on loans from foreign financial institutions that fund investment projects (Art. 353)
- Management, technical and consulting fees are Uzbek-source income even when the work is done abroad (Art. 351)
- The tax is paid by the day after the payment and reported by the 20th of the next month

Treaties

- 55 double tax treaties in force. Most reduce withholding on dividends, interest and royalties
- The treaty rate applies only with a certificate of tax residence given before the payment, apostilled or printed from the foreign tax authority's website (Art. 358)
- For dividends, interest and royalties the recipient must be the beneficial owner
- Tax withheld for lack of a certificate can be reclaimed later

Permanent establishment

A fixed place of business creates one, as does a building site or services through staff for more than 183 days in any twelve months, with related companies added together (Art. 36). Profit left at its disposal is taxed like a dividend at 10%, unless a treaty sets a lower rate.

Treaty rates for the main investor countries

Maximum withholding tax on payments from Uzbekistan, in percent of the gross amount.

Country	Dividends	Interest	Royalties
No treaty	10	10	20
China	10	10	10
France	5/8	0/5	0
Germany	5/15	5	3/5
India	10	10	10
Italy	10	5	5
Japan	5/10	5	0/5
Kazakhstan	10	10	10
Netherlands	5/15	10	10
Russia	10	0/10	0
Singapore	5	5	8
South Korea	5/15	5	2/5
Switzerland	5/15	0/5	5
Türkiye	10	10	10
United Arab Emirates	5/15	10	10
United Kingdom	5/10	5	5

Where two rates are shown, the lower one applies to substantial shareholdings or to particular types of interest or royalties. Where a treaty rate is higher than the domestic rate, the domestic rate applies. Rates for all 55 treaties, with their conditions, are in Appendix 1 of our guide Doing Business in Uzbekistan 2026.

IN PRACTICE

A consulting fee paid abroad

An Uzbek company pays a German consultant UZS 500 million for advice delivered in Tashkent. The consultant has no permanent establishment in Uzbekistan.

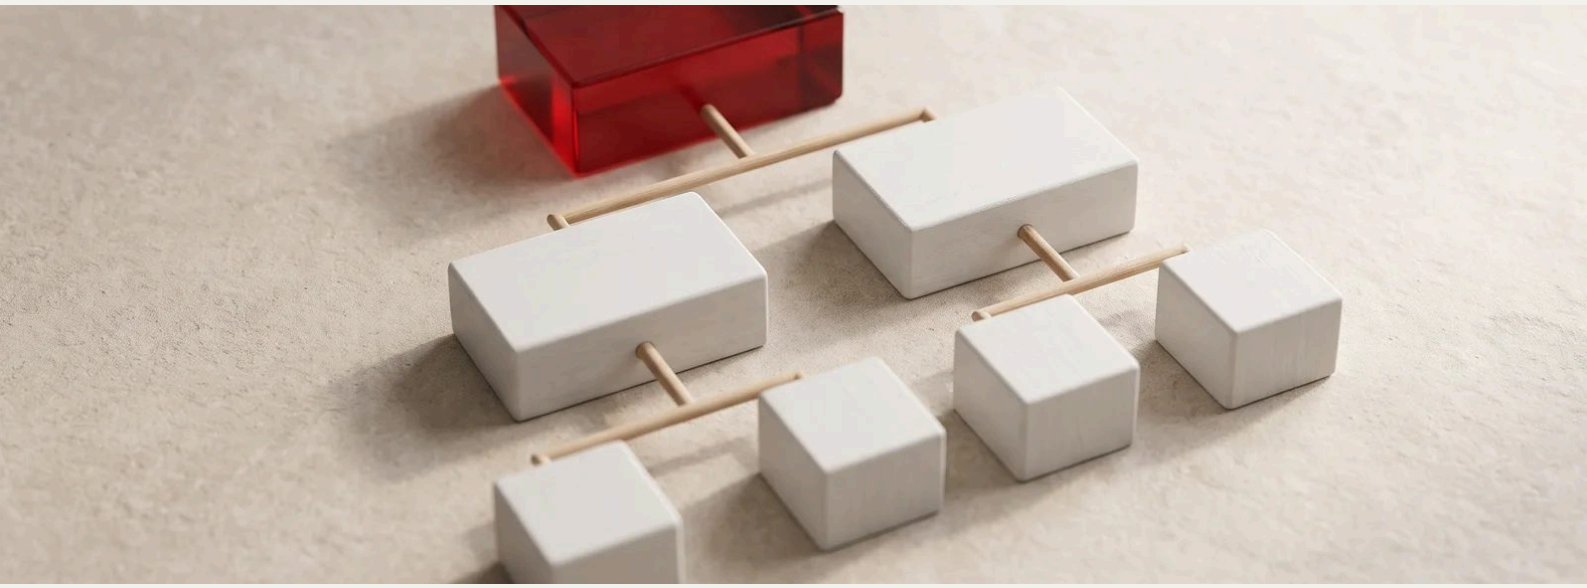

WITHOUT A RESIDENCE CERTIFICATE		WITH A GERMAN RESIDENCE CERTIFICATE	
Fee	500 000 000	Fee	500 000 000
Withholding tax, 20%	– 100 000 000	Withholding tax	0 (treaty)
VAT as tax agent, 12%	60 000 000	VAT as tax agent, 12%	60 000 000
Consultant receives	**400 000 000**	**Consultant receives**	**500 000 000**

VAT is paid by the Uzbek company as tax agent on top of the fee and can then be deducted.

Controlled foreign companies

An Uzbek resident that controls a foreign company includes the company's retained profit in its own taxable income. Control starts at a holding of more than 25%, or more than 10% when Uzbek residents together hold more than half.

The profit is exempt for active companies outside the official offshore list, and for treaty-country banks, insurers and companies paying an effective rate of at least 15%. Profit of UZS 300 million or less is ignored. Controlled companies are reported by 20 March of the following year (Arts. 204, 208, 209).

Registration, rates and invoices

Who is a VAT payer

VAT is charged at 12% on supplies of goods and services in Uzbekistan and on imports. Every Uzbek company is a VAT payer unless it uses turnover tax, which since 1 June 2026 is possible up to annual income of 12,000 base calculation values (Decree UP-100). Above that level VAT applies from the day the threshold is crossed.

Registration is made in the taxpayer's online account, and voluntary registration is possible. Returns are monthly, filed and paid by the 20th (Arts. 259, 273).

Rates

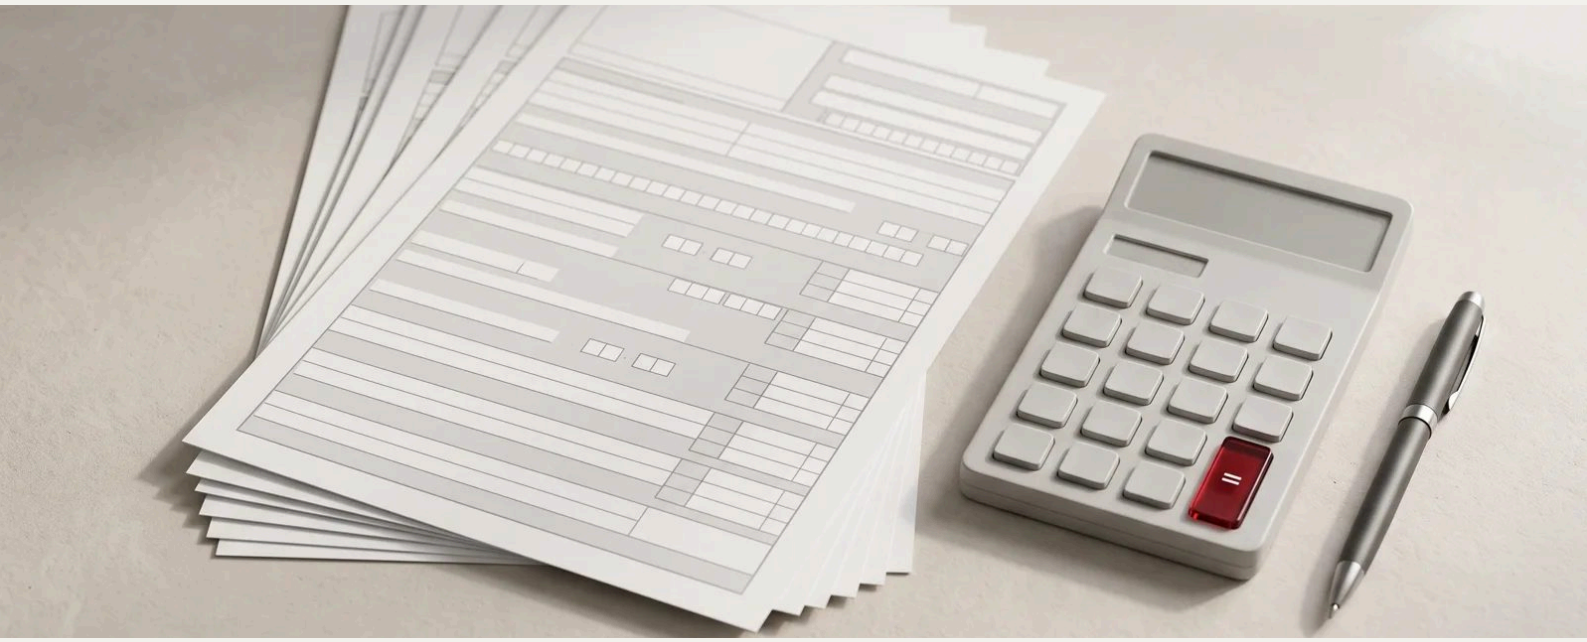

- **12%** standard rate
- **0%** on exports, international transport and other listed supplies (Art. 258)
- **6%** of turnover, without input VAT, as an option for retail, catering and services from 1 June 2026

Exemptions

Education, healthcare, financial services and a long list of social goods are exempt, and input VAT on exempt activity cannot be recovered. A zero-rated exporter keeps the right to recover input VAT but must prove the export with customs and payment documents. Since 2026 sales by listed agricultural producers, except cotton and grain, are zero-rated too.

Input VAT and e-invoices

Input VAT is deducted only on an electronic invoice from the state e-invoicing system. Since 1 January 2026 an automated system rates every invoice by risk, and VAT on a high-risk invoice is credited only once the supplier, or the buyer as tax agent, has paid it.

Services from abroad, digital sellers and refunds

Services from abroad

When a foreign company supplies services to an Uzbek business, the Uzbek business pays the VAT as tax agent and may then deduct it. If the price excludes VAT, the buyer adds 12% and pays it from its own funds, whether or not it is itself a VAT payer (Art. 255).

As a rule a service is supplied where the buyer is established, so most services bought by an Uzbek company are taxed in Uzbekistan. Services tied to real estate or performed on site follow their own rules (Art. 241).

Refunds

Excess input VAT is carried forward or refunded. Since 1 June 2026 a balance of up to UZS 10 million is repaid to small businesses without an application or audit. Larger refunds are paid within 30 days of a desk audit (Art. 274). Large taxpayers, established exporters and those giving a bank guarantee are refunded within seven days, and businesses rated AAA within one day.

Foreign digital sellers

Foreign providers of digital services to consumers register and pay VAT directly through the tax portal. They register within 30 days of the first sale and file and pay quarterly by the 20th of the following month (Arts. 279 to 281). When the customer is an Uzbek company, the company pays as tax agent.

GOODS SOLD ONLINE FROM 12 DECEMBER 2026

- Foreign sellers of goods to consumers in Uzbekistan through electronic platforms become VAT payers
- Uzbek platforms that settle with foreign sellers pay the VAT as tax agents
- Direct sellers register within 30 calendar days of the first sale
- Law ZRU-1173 of 10 September 2026

Turnover tax and the simplified 6% VAT

The reform of 1 June 2026 raised the turnover tax threshold and added a new 6% VAT option for retail, catering and services.

Turnover tax

Turnover tax replaces profit tax and VAT. Since 1 June 2026 a company may use it while annual income stays below 12,000 base calculation values, instead of UZS 1 billion (Decree UP-100 of 26 May 2026). Turnover tax payers still pay social tax and property, land and water taxes. Returns are monthly by the 15th, with an annual return by 15 February (Art. 470).

Taxpayer	Rate
All sectors, unless listed below	4%
Retail in cities of 100,000 people or more	4%
Retail in other settlements	2%
Retail in remote and mountain districts	1%
Individual entrepreneurs and the self-employed	1%

Tax Code, Art. 467. Importers, producers of excisable goods, mining companies, tax consultants, auditors and others cannot use it (Art. 461).

The simplified 6% VAT

From 1 June 2026 to 1 January 2030, a business whose main activity is retail, catering or services may pay VAT at 6% of total turnover instead of 12% on value added. Its profit tax rate is then 0%, but it cannot deduct input VAT and loses refunds. Its customers can still deduct the 6%. Large taxpayers, state-owned enterprises and manufacturers cannot use it.

CHOOSING BETWEEN 6% AND 12%

- 6% suits high-margin businesses with few taxable inputs
- Businesses with large VAT-bearing purchases usually pay less at 12%
- Exporters lose the zero rate and refunds under 6%

Personal income tax and social tax

- **Residency:** more than 183 days in Uzbekistan in any twelve months beginning or ending in the tax year (Art. 30). Residents are taxed on worldwide income
- **12%** flat personal income tax for residents. Non-residents pay 12% on employment income and 10% on dividends and interest (Arts. 381, 382)
- **5%** on dividends and interest of residents, withheld by the payer. Bank deposit interest is exempt
- **12%** social tax paid by the employer on top of gross payroll (Art. 405)
- Returns and payments monthly by the 15th, annual employer report by 15 February
- 0.1% of salary goes to an individual pension account and is deducted from the income tax withheld (Art. 385)

Foreign employees

Foreign employees of an Uzbek company are taxed like local staff. When a foreign company seconds staff under a service contract, the Uzbek recipient pays social tax on their pay, and at least on 90% of the contract value (Art. 404).

Since 1 January 2026 foreign citizens who pay a fixed fee, own or rent housing in Uzbekistan and spend more than 30 days a year there may have their foreign-source income exempted for up to five years (Decree UP-180).

The full cost of an employee

A resident specialist on a gross salary of UZS 10,000,000 a month.

EMPLOYEE	
Gross salary	10 000 000
Personal income tax, 12%	− 1 200 000
incl. pension, 0.1%	10 000
Net salary	**8 800 000**

EMPLOYER	
Gross salary	10 000 000
Social tax, 12%	+ 1 200 000
Total cost	**11 200 000**

OTHER TAXES

Property, land, water, subsoil and excise

- **Property tax 1.5%** of the average net book value of real estate, but not less than a minimum value per square metre (Arts. 412, 415). 3% for construction left unfinished beyond its term, 0.7% for railways, trunk pipelines and power lines
- **Land tax** is a fixed amount per hectare set by region and adjusted locally. Rent for state land counts as land tax (Art. 429)
- **Water use tax** per cubic metre, five times the rate above the permitted limit (Art. 445)
- **Subsoil use tax** as a share of the value extracted, for example 10% for oil and gas, 7% for gold and copper, 4% for coal (Art. 452)

Excise

Due on the production and import of tobacco, alcohol, fuel, natural gas, polyethylene granules, sugary and energy drinks and crisps. Rates are fixed per unit or a share of value, and the return is due monthly by the 10th (Art. 292).

Property tax returns are annual by 1 March, with monthly advances by the 10th.

Related-party transactions under control

Controlled transactions

The rules cover transactions between related parties, foreign trade in exchange-traded commodities such as metals, fertilisers, oil products and cotton, and any deal with a party in a listed offshore jurisdiction (Arts. 180, 181).

Thresholds

Cross-border related-party transactions are controlled whatever their size. Deals between related Uzbek residents are controlled above UZS 5 billion a year, or UZS 500 million when one side has a special regime or reduced rate.

Documentation

Controlled transactions are notified by the deadline for annual financial statements (Art. 182). Documentation can be requested from 1 June of the following year and must be provided within 30 days (Arts. 193, 195). Advance pricing agreements are available.

AUTOMATED CONTROL

In May 2026 the Tax Committee announced an automated system that identifies related parties, tests prices against the market and flags risks. Expect questions on related-party prices before any audit starts.

GLOBAL MINIMUM TAX (PILLAR TWO)

- Uzbekistan joined the OECD Inclusive Framework in 2023 but has not introduced the 15% minimum tax
- The rules apply to groups with revenue of EUR 750 million or more
- At 15%, the standard rate meets the minimum
- Subsidiaries on 0% rates or incentives may trigger top-up tax abroad

Special regimes compared

Uzbekistan grants tax relief mainly through territories and statuses rather than case-by-case deals. Since 2026, individual incentives may be granted only by presidential decision, as a rate reduction of no more than 50% for no more than three years.

Regime	Main benefit	Term	Main condition
Special economic zone	Property, land and profit tax relief	3 to 10 years	Investment from USD 300,000
IT Park	All taxes exempt, 7.5% personal income tax	To 2028, then to 2040	IT activity and export share
Creative Industry Park	Personal income tax and social tax halved	To 1 January 2031	Creative industry activity
Tashkent International Financial Centre	0% profit and social tax	To 1 January 2076	Financial services and substance
High-tech production	0% profit tax	3 years	Listed high-tech product
Foreign-invested enterprise	Land and property tax exempt	3 to 7 years	Foreign share of 33% and location outside Tashkent

For special economic zone participants from 1 April 2026 the profit tax benefit takes the form of accelerated depreciation. IT Park benefits from 2028 apply only to residents exporting more than 50% of income. Each regime has further conditions, and our guide Doing Business in Uzbekistan 2026 describes them in detail.

Registration, audits, penalties and appeals

Registration and e-invoicing

A company is registered for tax automatically on incorporation. A foreign company with a permanent establishment registers within 30 days if its contract exceeds 183 days, and otherwise within 183 days (Art. 130). Invoices are issued only through the state e-invoicing system, and since 2026 the authority pre-fills VAT, turnover tax and payroll returns.

Audits

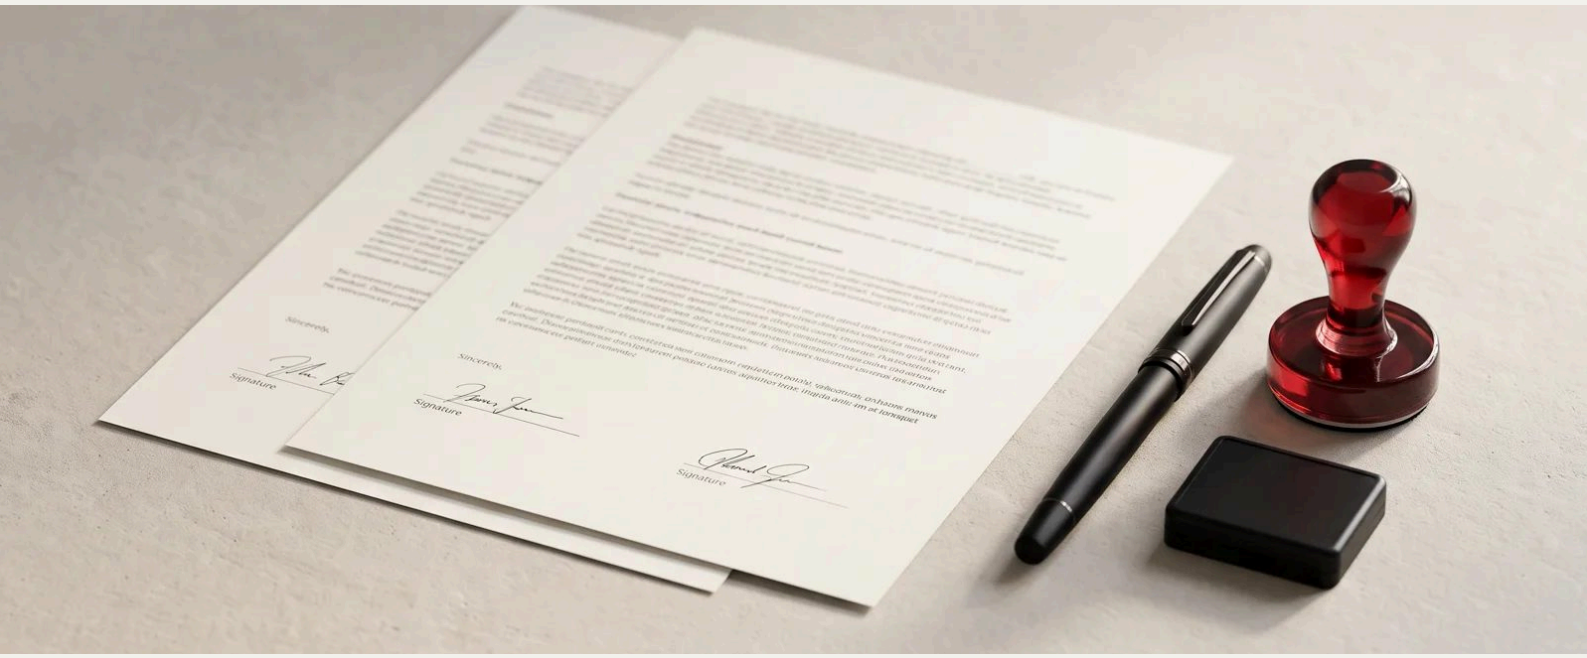

Desk audits review returns. Full tax audits target high-risk taxpayers, are announced 30 days ahead and last 30 days, extendable to six months (Arts. 137 to 142). Tax can be reassessed for three years after the end of the period (Art. 88). Businesses rated AAA are not audited, except in criminal cases.

Penalties

- **20%** of underpaid tax
- **20%** of a concealed tax base
- **40%** of the tax on non-market transfer pricing (Arts. 223 to 226)
- Halved for prompt payment with admission
- Late payment interest of 1/300 of the Central Bank refinancing rate per day

Appeals

Audit decisions can be appealed to the higher tax authority within one month, and the appeal suspends collection (Arts. 231, 232). The taxpayer may also go directly to court. If a decision is cancelled, tax and penalties are returned with interest.

Main deadlines for a company

Every month

Day	What is due
10th	Excise. Property and land tax advance
15th	Personal income tax and social tax. Turnover tax
20th	VAT. Withholding tax return for non-residents
23rd	Profit tax advance if prior-year income exceeded UZS 20 billion
Next day	Withholding tax on payments to non-residents

Every quarter

20 April, July, October	Profit tax return and payment
20th after each quarter	VAT of foreign digital service providers

Every year

Date	What is due
20 January	Property and water tax estimate. Land tax return
15 February	Annual employer return. Annual turnover tax return
1 March	Profit tax annual return. Property and water tax. Financial statements. Transfer pricing notification
20 March	Controlled foreign companies
1 April	Individual income tax declaration, payment by 1 June
1 May	IFRS financial statements

When a deadline falls on a weekend or public holiday, it moves to the next working day. Payment is due no later than the filing date unless stated otherwise.

HOW WE HELP

Tax advice, filings and audits in one team

Structuring and tax planning, treaty access, transfer pricing files, VAT, payroll taxes, monthly filings and support in tax audits and disputes. We answer in English, Russian, Uzbek or German. The first call is free.
